

# Human Gastric Cancer Organoid

**Product Code:** TDC-T1301

**Price:** \$2,999.00

## Description

Human gastric cancer organoids have emerged as a vital tool for gastric tissue and cancer research. In recent years, gastric cancer organoids have demonstrated remarkable potential to closely replicate the structural and functional characteristics of the original gastric cancer tissue. These organoids serve as a model system that offers significant advantages over traditional cell lines, patient-derived xenografts (PDXs), and genetically engineered mouse models (GEMMs).

## Specification

Biological	
Disease	Cancer
Source Organ	Gastric tumor
Species	Human
Shipping and Handling	
Shipping Temperature	Dry ice
Storage Temperature	Liquid nitrogen
